DIGITAL DEALER BUTTON

Tired of using your mama's hourglass egg timer or your buddy's annoying wristwatch to keep time at your poker tournaments? DB Dealer has a simple solution. It's a digital dealer button with the timer built right into the white plastic disk that you use to keep track of who is the dealer during your event. The time left before the next blind increase is right there for all to see, and it resets itself to the desired time limit after emitting a "time's up" alarm. Perfect! Check it out at dbdealer.com.
