DIGITAL DEALER BUTTON

Tired of using your mom's hourglass egg timer or your buddy's annoying wristwatch to keep time at your poker tournaments? DB Dealer has a simple solution. It's a digital dealer button with the timer built right into the white plastic disk that you use to keep track of who is the dealer during your event. The time left before the next blind increase is right there for all to see, and it resets itself to the desired time limit after emitting a "time's up" alarm. The latest version of the electronic button/timer, the DB2, includes a "bet button" that adds a speedy dimension to the event. This button can be pressed by any player to "put a disk" on a slow-acting opponent. When the 30-second clock is up, the player must act or his hand is dead. The DB2 is offered with a sleek chrome finish in a metal case for \$24.95. The chrome DB2 and other timer/buttons can be found at dbdealer.com.

AUTOMATED HEADS-UP TABLE

Heads-up poker has seen a surge in popularity on online poker sites and on TV. Heads-up action is fast, the games are brutal and only the strongest survive. This is poker's most ruthless and intensely personal variation and unfortunately, it's almost impossible to find a casino offering it. PokerTek, the company that invented automated poker, is changing that. "PokerPro Heads-Up" is the world's first automated two-person poker table. The touch-screen table can deal more tournaments per hour than you could possibly play, and can also handle cash games. For you, that means more chances to settle old scores, build your bankroll and find out what you are really made of. To find out where you can play PokerPro Heads-Up, check out www.pokertek.com.

'I DROOL' INFANT CREEPER

The smallest poker fan can creep, crawl and sleep in this comfy 100 percent cotton infant one-piece tee, and the three-snap bottom offers easy changing for poker moms and dads. Available in baby blue, pink and white backgrounds with "My tell: When I drool I'm not bluffing" text paired with a royal flush graphic on the front. Available in sizes six months, 12 months, 18 months and 24 months, standard T-shirt neck. \$18.99, available at www.onlypoker.com.

'JUST SAY NO TO TILT' POSTER

Drugs might be deadly, but in poker, tilt is the real killer. This funny take on the famous "Just Say No" campaign is a great addition to any poker room or office. Two-card displays range from pocket rockets ("This is your brain") to A-6 ("This is your brain on drugs") to 7-2 ("This is your brain on tilt"). 24-36 inch softboard poster, \$7.99, available at www.subtlypoker.com.

This is your brain.

This is your brain on drugs.

This is your brain on Tilt.

Any questions?
